

Find the surface area of a pentagonal prism by finding the area of a 2D net, Practice Set C

Name:

Date:

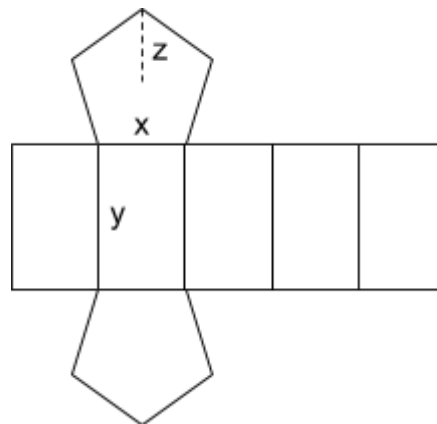

- Matthew is wrapping a birthday gift for his brother. He has 100 ft^2 of wrapping paper. Will that be enough?

- The regular pentagonal prism has a surface area of $3,485 \text{ in}^2$. Determine the value for s .

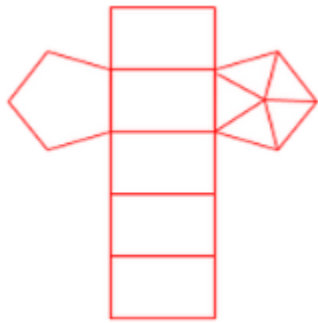

- Determine the values of x , y , and z that could be a regular pentagonal prism with a surface area between $2,000 \text{ in}^2$ and $3,000 \text{ in}^2$. Find three possibilities.

Find the surface area of a pentagonal prism by finding the area of a 2D net, Practice Set C

Answer Key

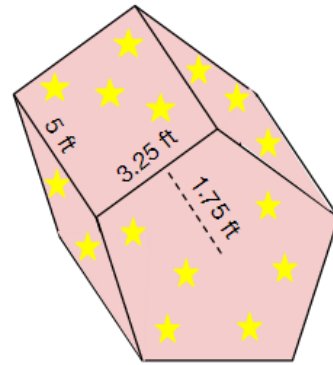

1. Matthew is wrapping a birthday gift for his brother. He has 100 ft² of wrapping paper. Will that be enough? **No, it will not be enough because Matthew will need about 110 ft².**

$$\text{Area of rectangle} = (5 \text{ ft})(3.25 \text{ ft}) = 16.25 \text{ ft}^2$$

$$\text{Area of triangle} = \frac{1}{2}bh = \frac{1}{2}(3.25 \text{ ft})(1.75 \text{ ft}) = 2.84375 \text{ ft}^2$$

$$\text{Surface area} = 5(16.25 \text{ ft}^2) + 10(2.84375 \text{ ft}^2) = 109.6875 \text{ ft}^2$$

2. The regular pentagonal prism has a surface area of 3,485 in². Determine the value for s. s = 16 in

$$\text{Surface area} = 5(\text{area of rectangle}) + 10(\text{area of pentagon})$$

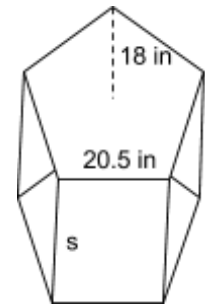

$$3,485 \text{ in}^2 = 5(20.5 \text{ in} \times s) + 10(\frac{1}{2} \times 20.5 \text{ in} \times 18 \text{ in})$$

$$3,485 \text{ in}^2 = 5(20.5 \text{ in} \times s) + 1,845 \text{ in}^2$$

$$1,640 \text{ in}^2 = 5(20.5 \text{ in} \times s)$$

$$328 \text{ in}^2 = 20.5 \text{ in} \times s$$

$$16 \text{ in} = s$$

of

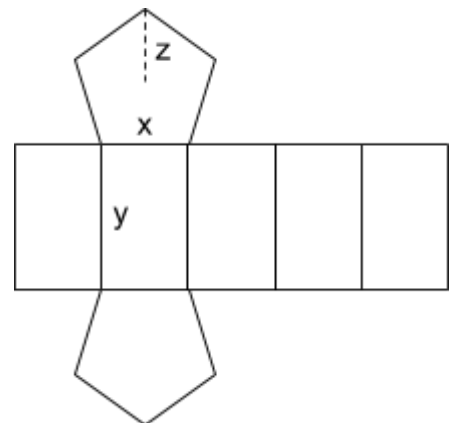

3. Determine the values of x, y and z that could be a regular pentagonal prism with a surface area between 2,000 in² and 3,000 in². Find three possibilities.

Answers will vary. Examples below:

Possibility 1 Possibility 2 Possibility 3

x = 18 in x = 17 in x = 16.5 in

y = 16 in y = 22 in y = 15.2 in

$$z = 8 \text{ in}$$

$$z = 10 \text{ in}$$

$$z = 12.75 \text{ in}$$

$$SA = 2080 \text{ in}^2$$

$$SA = 2970 \text{ in}^2$$

$$SA = 2223 \text{ in}^2$$
