

How do you use paper clips
to find the difference in length
between a toy car and pencil?

In this lesson you will learn to
find the difference in length
between two objects by using
paper clips and cubes.

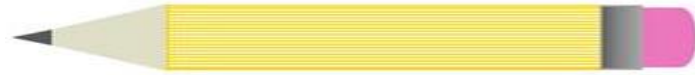

Let's Review

How many paper clips long?

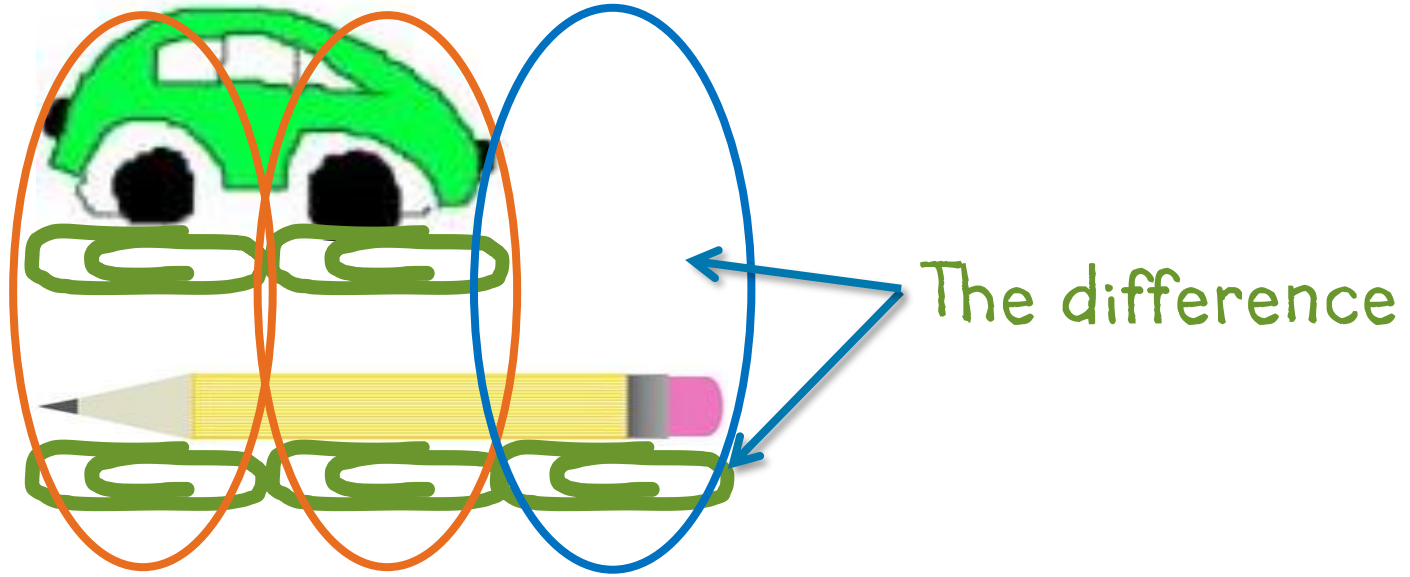

A Common Misunderstanding

It doesn't matter if I
use different size
units to measure.

Core Lesson

What is the difference?

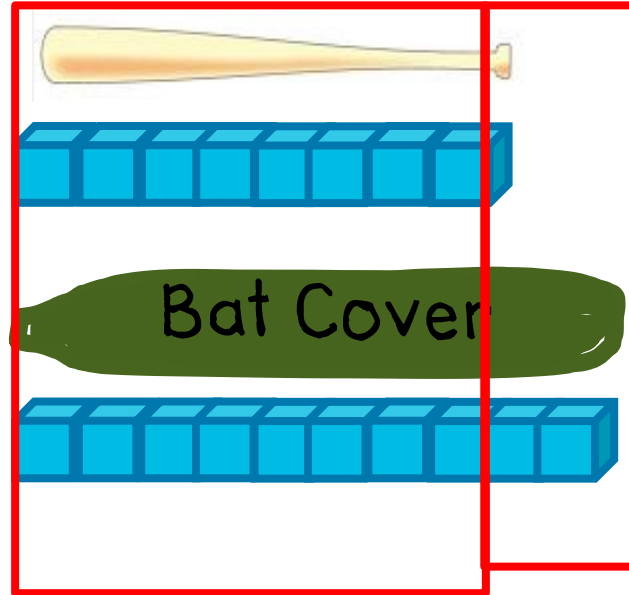

The pencil is one paper clip longer than the toy car.

The car is one paper clip shorter than the toy car.

Core Lesson

Anthony has a baseball bat and a baseball bat cover. Will Anthony's baseball bat fit into the baseball bat cover?

The cover is 2 cubes longer than the bat!

In this lesson you have learned
to find the difference in length
between two objects by using
paper clips and cubes.
